

Health/Safety Concerns

Health and Safety are perhaps two of the greatest concerns for most traveling to places they have never been to before. River Valley Church and the staff of Global Project take both very seriously.

Travel Warnings and Alerts

Often when an individual decides to go to a place they have never been, both the individual and family begin to listen more closely to what is happening within that particular country. Because there is so many sources for news and opinions (some reliable and not so reliable), we regularly monitor the [US State Departments Travel Warnings and Alerts](#).

Emergency Medical/Travel Insurance

As part of the trip cost, every international Global Team member receives Emergency Medical and Travel Insurance. For more detailed information, please visit volunteercard.com.

Vaccinations/Immunizations

Regarding vaccinations and immunizations we defer to the US State Departments recommendations and requirements. For country specific information, please visit travel.state.gov. For more general recommendations please visit cdc.gov or a local travel clinic. For specific recommendations please talk with your personal doctor

On-Trip Emergency

Prior to departure, you will be given an emergency contact that you can give to family and friends, should they need to get ahold of you, in the event of an unforeseen circumstance.

Questions/Concerns

If there are any questions or concerns regarding health and safety, please feel free to contact globalproject@rivervalley.org.
